java.Scenario)

(S) System should allow user to do a  
modification on already approved record

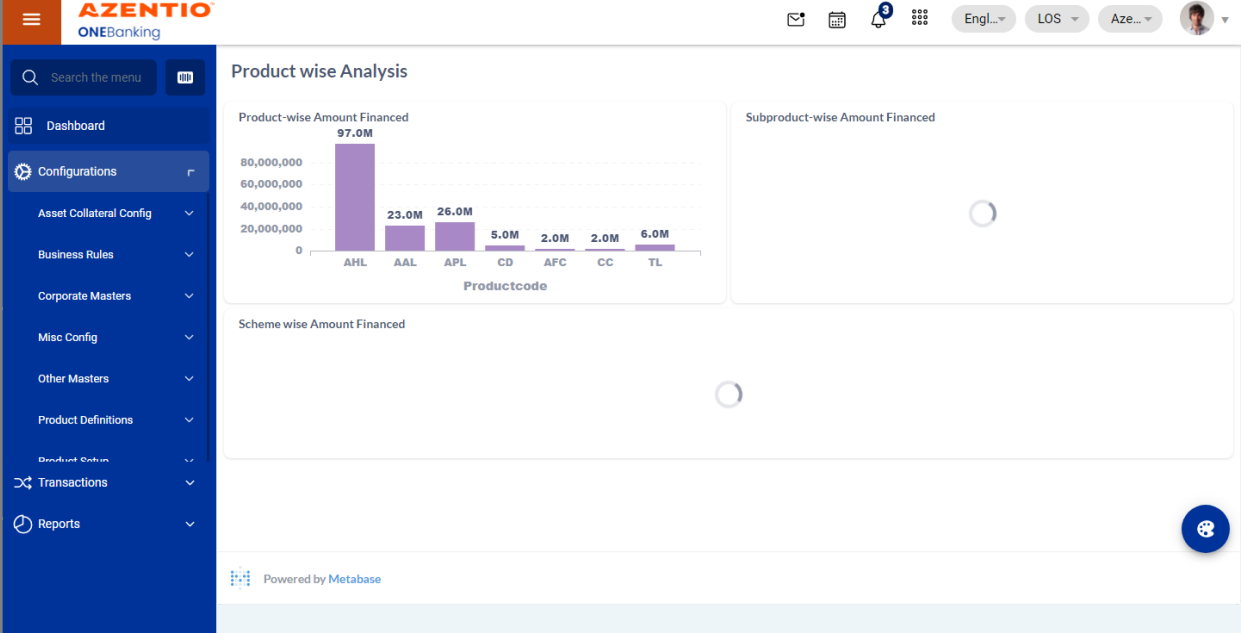

(F) collateral Functionality

The screenshot displays the AZENTIO ONEBanking application. On the left is a blue sidebar menu with options: Dashboard, Configurations (expanded), Asset Collateral Config (expanded), Collateral, Collateral sub type, Collateral type, Business Rules, Corporate Masters, Misc Config, Other Masters, Product Definitions, and Transactions. The main content area is titled 'List of Asset/Collateral categories'. It features a search bar with 'FD31' and an 'Export' button. Below is a table with columns: Action, Asset/Collateral Category Code, AssetCollateral Category Description, Created By, and Status. One record is visible: FD31, FixedDepo, in00135, and an 'Active' status. At the bottom right of the table area is a blue circular button with a gear icon. The top right of the interface shows user profile information and language/region settings.

(Step) AFTER\_STEP - stepdefinitions.  
HooksClass.addScreenshot(io.cucumber.  
java.Scenario)

(S) System should allow user to do a  
modification on already approved record

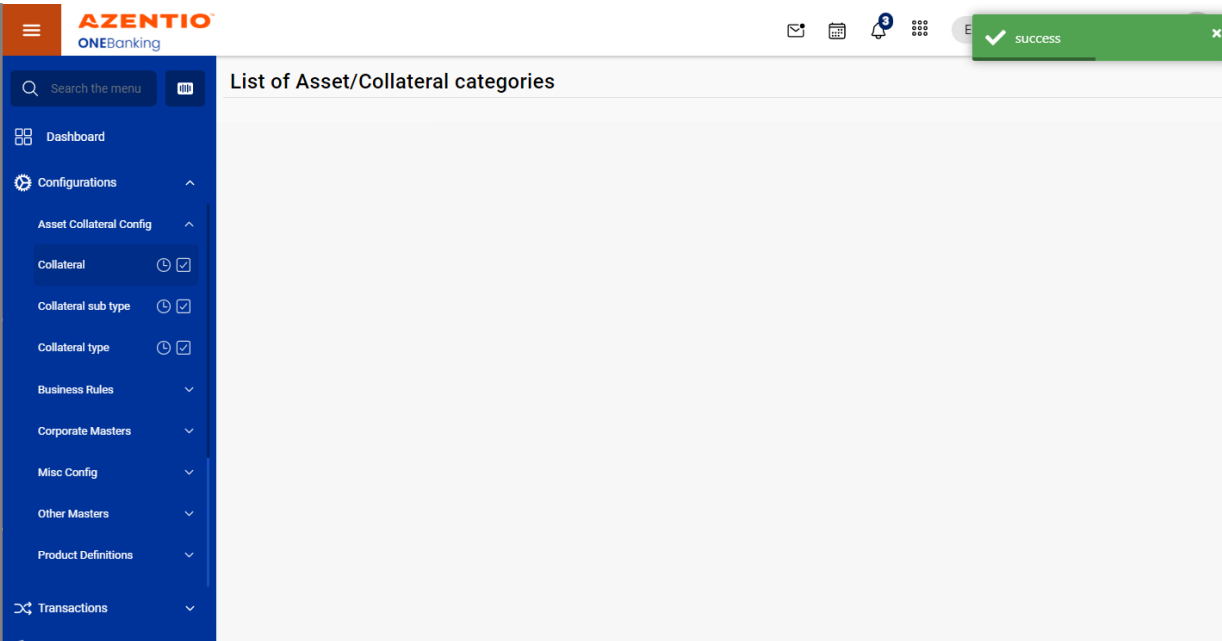

(F) collateral Functionality

This screenshot shows the 'Asset / Collateral categories' detail form in the AZENTIO ONEBanking application. The sidebar menu is identical to the previous screenshot. The main form area is titled 'Asset / Collateral categories' and 'Asset / Collateral Category Detail'. It contains several input fields: 'Description' with the value 'FixedDepo', 'Asset / Collateral Category Code' with 'FD31', and 'Module' with 'LM'. There are also toggle switches for 'Registration Required' and 'Repossession Allowed', both of which are currently turned on. A 'Status' toggle is at the bottom left and is turned off. A 'Remarks' field contains the text 'OK'. The top right of the interface shows the same user profile and settings as the previous screenshot.
